

Polymatech Group

We polymatech exhibit our booth at
2ndWearable Expo
from 2016 Jan13th - Jan15th
Booth Number 【E21-16】

I enclosed an exhibition free complimentary ticket, so I'd like to give high inspection, and I guide you our product technology.

Further, I'll prepare a in-depth suggestion to you, so I should be very much obliged if you can inform of the arrival date and time and the contents, etc. beforehand.

※Without forgetting it, please bring me a complimentary ticket.

Nice Touch Feeling Rubber Band

Development items

Rubber BAND with the stretch wiring

◆ Nice Touch Feeling Rubber Band ◆
Silicone material based rubber band. Compounded with high physical performance material instead of normal one. Various durometer and coloring upon request. Also capable of processing with the geometry of Wristband or Ring type. By special coating, surface with velvety textures is available. Many processing options provided for the rubber surface; e.g. texturing, PAD printing, laser printing, etc.

◆ Rubber BAND with the stretch wiring ◆
This development product constitutes printed wiring to follow a shape change by a favorite design on a rubber which molded or rubber sheet. We develop low resistance type that resistance won't change against bent, twist and stretch sensor type that constant resistance for stretch of rubber. Expect application to wearable devices..
